PHILOSOPHY
To provide children the opportunity to engage in developmentally appropriate activities and instruction that are both purposeful and playful using whole group, small group, and individual learning experiences. The focus is on the standards of preschool education as described in the California Department of Education’s Preschool Learning Foundations. These standards include social-emotional development, language and literacy, and mathematics. Through child-centered play and fun-filled, enriching activities, children will gain the foundational skills that will help achieve student success into their school years.

VISION
To provide rich opportunities and experiences to meet each child’s need for emotional, physical, social, cognitive and creative growth and success. Through preschool experiences children will become school ready by developing problem-solving techniques, independence, perseverance and the skills needed to work positively and respectfully with others.
